

CSLT Connectors Switchback Quick-Coupling Connectors

INTRODUCTION

The CSLT is a quick-coupling connector for use in avionics systems. It can be used with PC tail and solder cup contacts in the receptacle and standard AS39029 size 20 contacts in the plug. This connector can be polarized in six different positions and its bayonet post design is just an example of the capabilities we have available for your custom interconnect solutions.

CSLT Connector

FEATURES & BENEFITS

Features	Benefits
Designed with aerospace-grade materials	Supports rugged environments and commercial aerospace
Six polarization options	Allows flexibility for multiple connector use
Bayonet shell design	Quick coupling/decoupling
Visual coupling indication band	Basic visual indicator of fully-mated condition
