

Amphenol CMT specializes in advanced components, interconnect technologies, and device assemblies designed to meet the critical needs of the medical OEM industry. We are your single source for highly-innovative, costcompetitive medical device design and development, coupled with world-class contract manufacturing services.

Like you, we are passionate about creating innovative medical solutions. As your integrated-solutions partner, we can design, build, test, qualify, and deliver technology that helps accelerate your product to market.

Amphenole

Amphenol CMT is equipped to support you across the product life cycle, from full development to commercialization for a broad range of products. Whether you need a vertically integrated, turnkey program or à la carte service or capability, we are uniquely able to design, build, test, and deliver solutions with unparalleled responsiveness and speed-to-market.

With a global footprint, awardwinning teams of design and engineering experts, and extensive manufacturing capabilities,

we leverage expertise from decades of component and assembly development and manufacturing and our product design and development groups' ability to engineer optimized solutions.

This business model, coupled with our ongoing investments in strengthening our global Quality Management System (QMS), positions us as a partner in the development and manufacture of a wide range of products. ACMT is also able to offer Low Cost Region manufacturing capability in China and Mexico, giving our customers flexibility when demand and cost-structure requirements need to be met.

From design to service & component, to device, we've got you covered.

Design & Development

User Research, Industrial Design, Mechanical & Electrical Engineering, UI/UX Design, Project Management, Regulatory Management & Documentation

Assembly

Cleanroom Assembly, Cable Assembly, Automated Assembly, Overmolding, Soldering, Welding, Bonding, Coating, Labeling

Components

Injection Molding, Thermoforming, Precision Flex Circuits, Bearings, Machined Metals, Interconnects, Cable, Tubing

Finished Device

Inspection, Testing, Sterilization Packaging & Management, Logistics & Supply Chain Management
